

CO-1 ASSESSMENT TOOL

CONCEPT MAPPING

Name : S. Nithesh

Reg No : 192524329

COURSE : Cloud Computing and Big Data Analytics

COURSE CODE : CSA1501

Cloud Computing

on demand Delivery of IT resources

Characteristics

- On demand self service
- Rapid Elasticity & Scalability

Essential Characteristics

- Broad Network access
- Resource Pooling
- Measured Services

Key benefits

- Cost Reduction
- Scalability
- Flexibility
- Business Continuity Disaster

Limitations

- Security & Privacy
- Vendor lock
- Internet dependency
- Reduce contract over Infrastructure.

Evolution of Cloud Computing

driven by 4 Key technological Pillars

Hardware Evolution

- Mainframes to x86 commodity PCs
- Multi core CPUs
- High RAM-Density
- High Density SAN
- NAS Storage

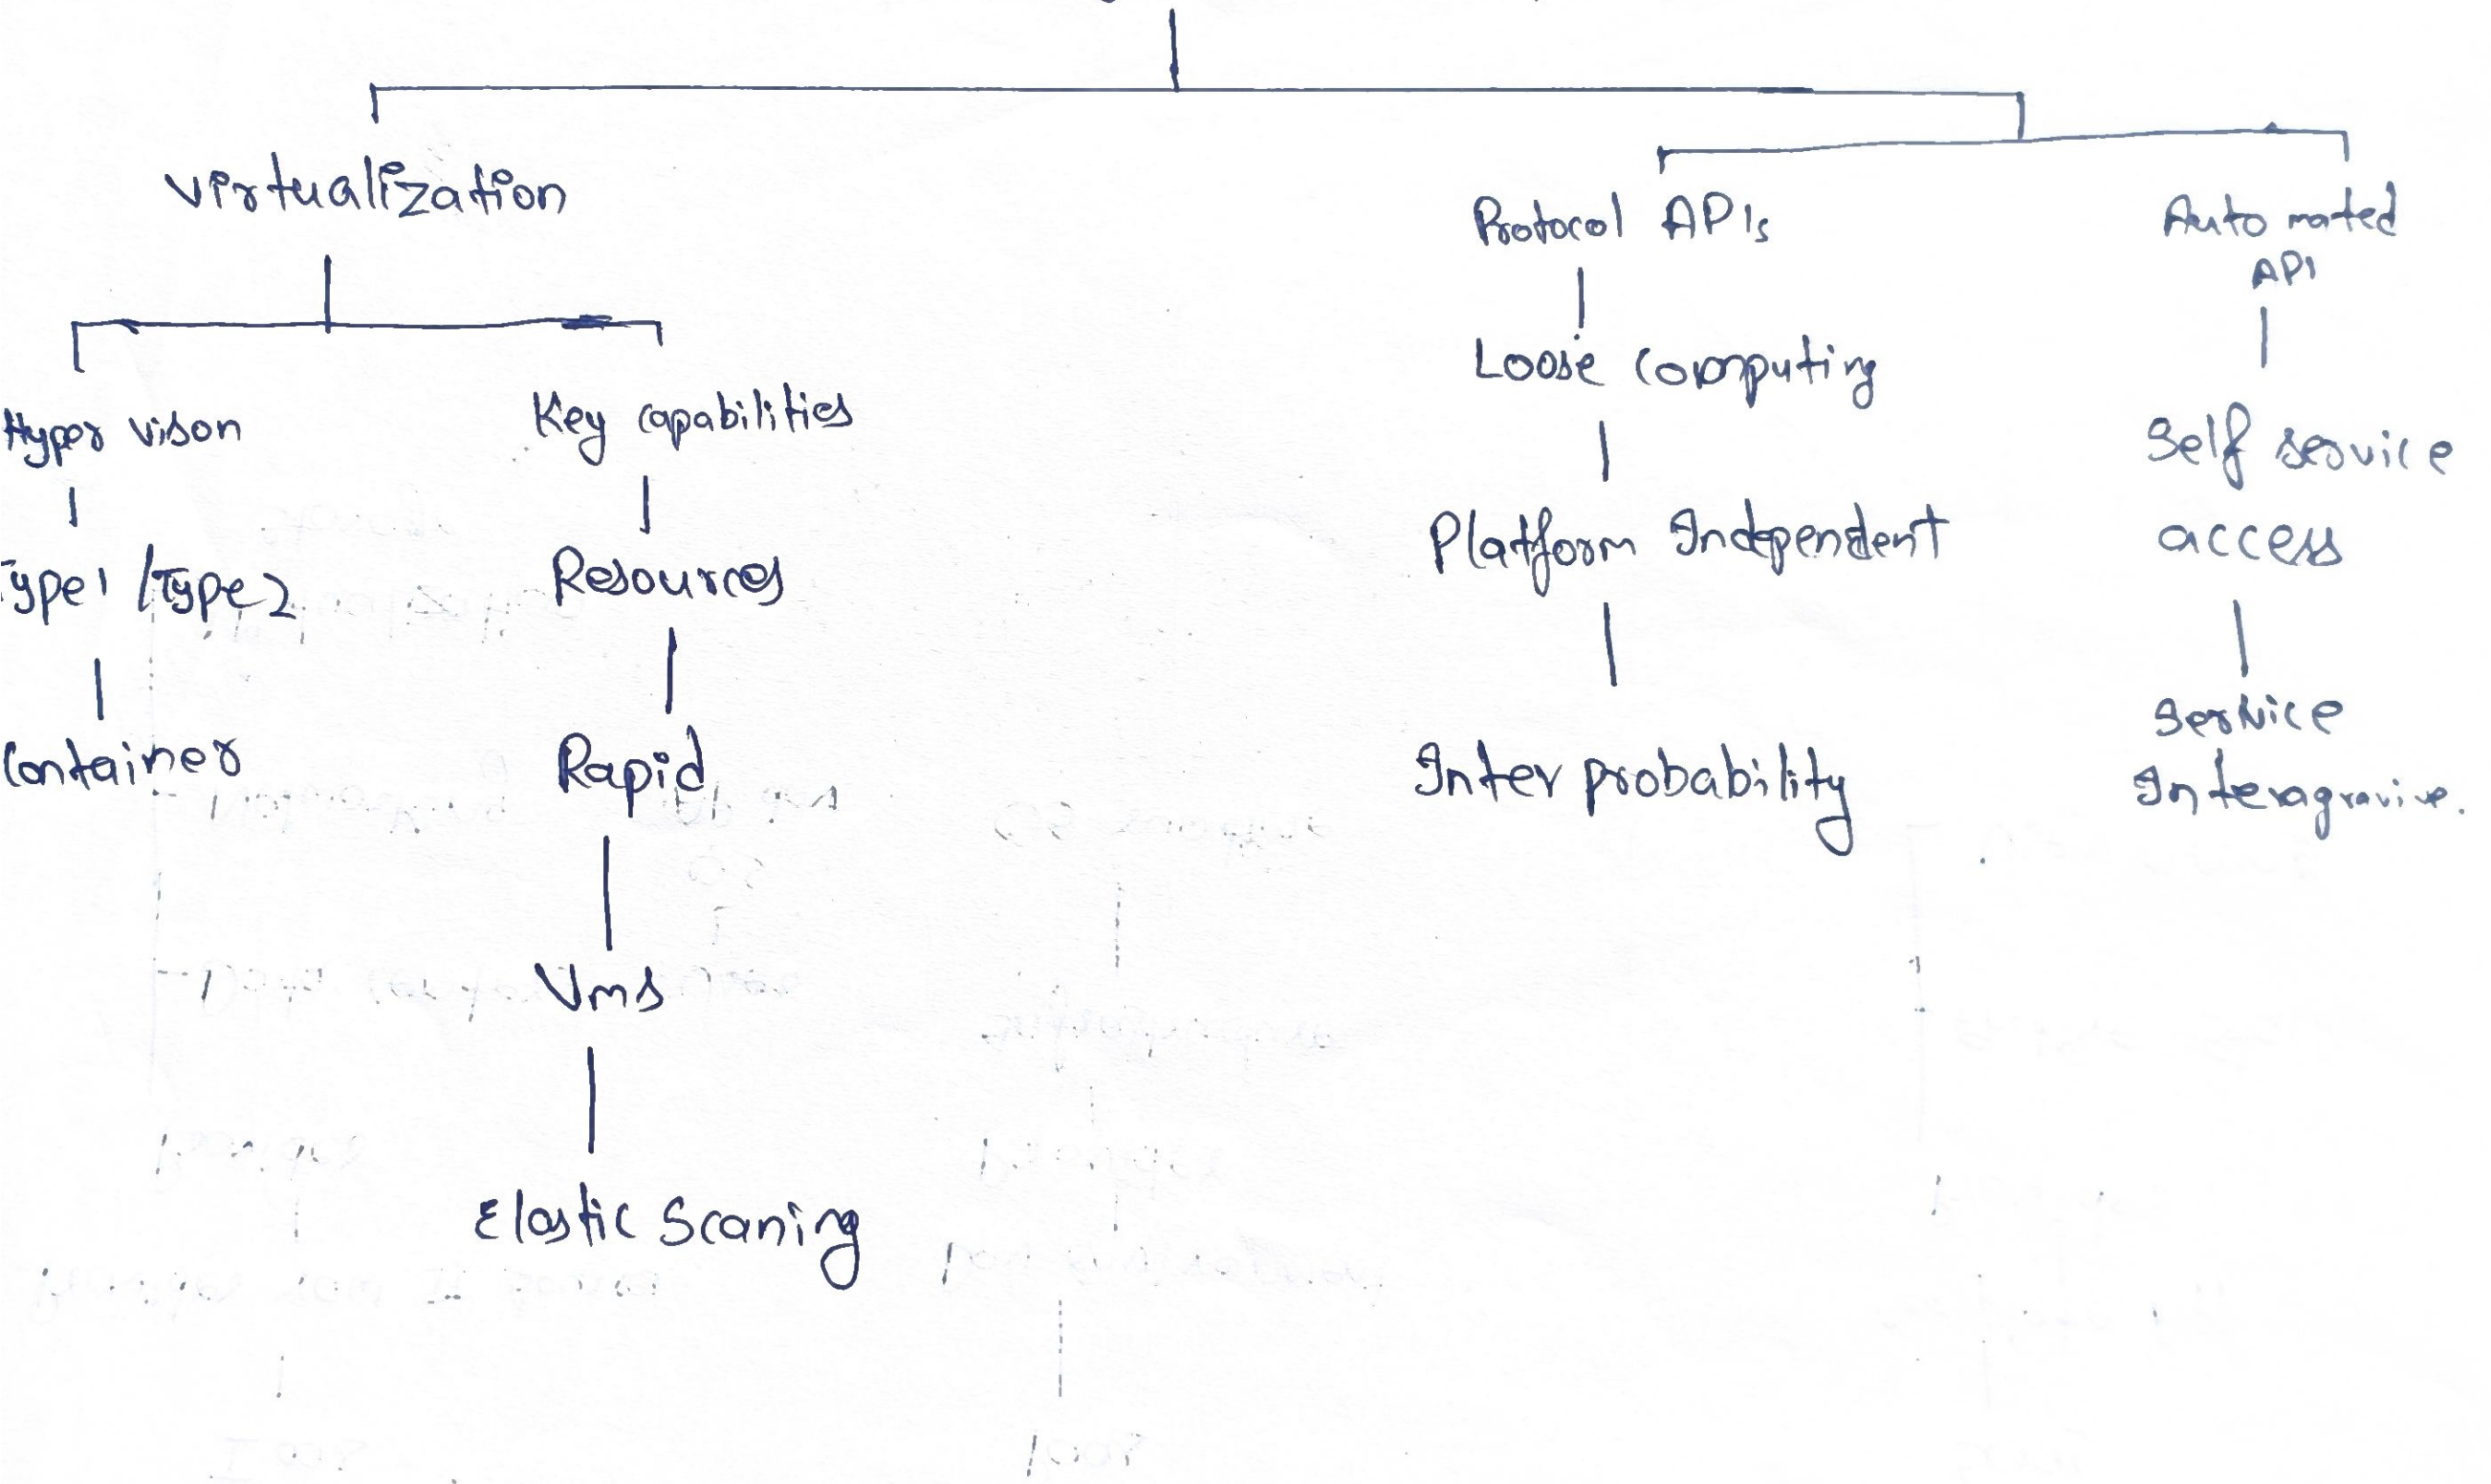

Internet & Software Evolution

- High speed broadband
- Web 2.0 interactive
- Service oriented architecture (SOA)
- Browser based thin clients.

Distributed System

- Grid Computing
- Utility Computing
- Cluster computing.
